# PERGOELIT

La nuova Pergoelit è il perfetto connubio tra utilità ed efficienza.
Ogni elemento è stato appositamente utilizzato per dare vita ad una Pergola estremamente semplice da installare. La gronda autoportante, le speciali clip bloccatelo, gli ancoraggi delle guide, il motore tubolare, tanti accorgimenti per un risultato sorprendente.
La Pergoelit monta guide e gambe da 13 cm.

**Modello Certificato**.

CE

**Caratteristiche**

# PERGOELIT*evo*

Come nel modello Pergoelit, Pergoelit EVO utilizza una guida da 13 cm ed il pacco telo standard.
Viene però proposta su questo catalogo con gronda e gamba da 14 cm .

L'utilizzo di questo modello è consigliato in caso di installazione all'interno di un vano .

**La gamba risulta montata a filo con la gronda ,** e aiuta nell'accostamento laterale della tenda a parete.

E' possibile montare la gamba XL; il palo maggiorato arrichisce la struttura , le da più stabilità e la rende esteticamente gradevole.
